

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application. Claims 1-27, and 29 were cancelled in a previous response.

Please amend the claims as follows:

1-27. (Cancelled)

28. (currently amended) A machine-readable medium having instructions to cause a machine to perform a method, the method comprising:

maintaining an address book data store on a device, the device capable of receiving and transmitting phone calls, the address book to include one or more pre-existing address book entries of one or more contacts, wherein each address book entry includes a first name field storing a pre-existing first name, a last name field storing a pre-existing last name, and a phone number field storing a pre-existing phone number;

identifying call information transmitted with a call, the call information including a new phone number;

associating the call information with one of the one or more pre-existing address book entries in the address book data store; and

updating the pre-existing address book entry with the new phone number upon determining the new phone number does not match the pre-existing phone number.

29. (Cancelled)

30. (previously presented) The method as in claim 28, wherein each address book entry includes a pre-existing date of call field and a pre-existing duration of call field, and the method further comprising:

updating said associated pre-existing address book entry with a date of the call and a duration of the call automatically without user intervention.

31. (previously presented) The method as in claim 28 further comprising:

querying a user of the device whether to update the associated pre-existing address book entry with the new phone number prior to updating the existing phone number in the associated pre-existing entry.

32. (previously presented) The method as in claim 28, wherein updating comprises:

supplementing said pre-existing address book entry with the new telephone number.

33. (previously presented) The method as in claim 28 wherein updating comprises:

replacing said pre-existing address book entry with the new telephone number without human intervention.

34. (previously presented) The method as in claim 32 wherein supplementing comprises:

classifying said new telephone number as a most recently used telephone number of said contact.

35. (previously presented) The method as in claim 32 wherein supplementing comprises:

classifying said new telephone number as an unknown type of number.

36. (previously presented) The method of claim 28, wherein the call is an incoming call.

37. (previously presented) The method of claim 28, wherein the call is an outgoing call.
